

HOW TO BUY AT BOOKWEAVER

STEP 1 – Click to Buy

Purchasing an item on BookWeaver.co.uk is a very simple process. You simply click the **Click to Buy** button located underneath the book you would like to purchase...

The Click to Buy button can be found on the category list pages...

At the bottom of each book information page...

And underneath the image on the book information pages

When you click on the **Click to Buy** button, you will see that another web browser window has opened with the corresponding item now being displayed at www.Amazon.co.uk

STEP 2 – Add to Basket

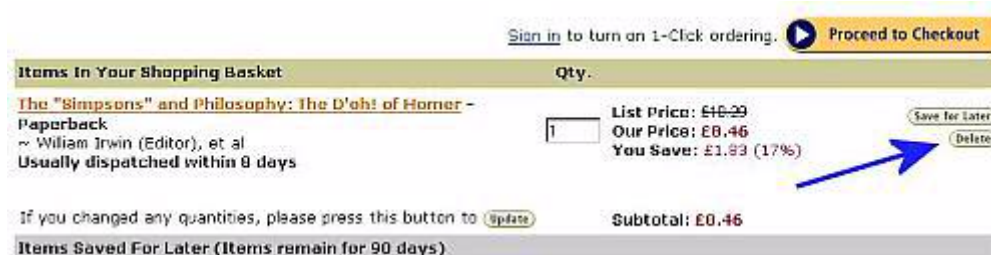

Next, please add your chosen item to the Amazon Shopping Basket by clicking their **Add to Basket** button.

N.B. It would be appreciated if you could do this before viewing any other goods at Amazon as this informs Amazon that you have initiated the purchase via the BookWeaver website.

The Amazon.co.uk **Add to Basket** button

Note: While shopping at Amazon you can delete items from your Shopping Cart anytime. You are not committed to the purchase until you reach the Check Out. Please feel free to experiment with the process of buying.

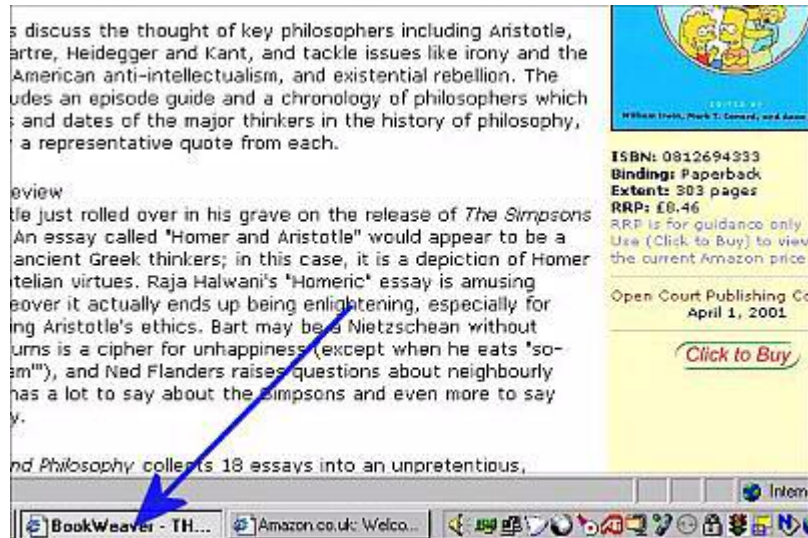

The Amazon **Delete** from basket button

Okay so far? ☺

STEP 3 – Returning to BookWeaver

To navigate back to BookWeaver simply click on the BookWeaver button on your Windows Start Bar and you will be ready to continue from the BookWeaver webpage that you were previously viewing.

The BookWeaver button displayed on the Windows Start Bar

By the way, the Amazon browser window will still be there but underneath the BookWeaver browser window, so your Amazon shopping cart will remain active while your return to BookWeaver to continue viewing our website.

STEP 4 - Adding Other Items To Your Cart

Simply click the **Click to Buy** button next to the book that you wish to buy on the BookWeaver website, then open up the Amazon page (click the Amazon button on your Windows Start Bar) and click **Add to Basket** on the Amazon page (just like before).

STEP 5 – Completing the Purchase at Amazon

Click on the Amazon.co.uk button on your start bar so that the Amazon browser is topmost on your desktop (with the BookWeaver browser behind instead of on top).

Probably the easiest way to navigate to the checkout is to first view the basket. You will see a **View Basket** option at the top right of the Amazon page...

The View Basket option on the Amazon website

From the basket, you can click the **Proceed to Checkout** button if you have an Amazon account set up, or create a new account where you simply add your address along with your preferred method of payment then confirm the purchase.

It's as simple as that.

Amazon provide a very secure and reliable service (we wouldn't affiliate with them if they didn't!). In fact, our technical department regularly purchase books and software via Amazon, items ranging in value from £5 to £500, so can personally recommend them.

Once an account is set up (by 'account' we mean register your name and address, preferred method of payment, and make your first purchase), buying via Amazon from then on is both simple and quick.

Delivery times and methods can vary depending on what is purchased, availability, and time of purchase etc. There is also a choice of delivery methods, and even whether you wish the item(s) to be gift-wrapped.

We think that once used to this method of purchasing you won't look back.

Regards,

The BookWeaver Team
